Title: Decision-Making: Where Science and Faith Meet

INTRODUCTION:

Welcome to Life Change! I'm Christian Psychiatrist Dr. Karl Benzio.

BODY:

Science is logical, tangible, reproducible facts. Hands on, observable, predictable occurrences. Faith is belief that does not rest on logical proof or material evidence. Hebrews 11 defines faith as the assurance of things hoped for, the conviction of things not seen. Visible versus invisible. Do Science and Faith contradict each other? Decision-making is where Science and Faith synergistically collide. Cutting edge research about brain science and psychology shows when we make Godly decisions according to Biblical principles, our brain chemistry actually improves. Thus, Science is proving the book of faith, the Holy Bible, to be the best psychiatric textbook ever written.

CLOSE:

If you or a loved one is struggling, go to 844lifechange.org or call 844-Life-Change. And remember, Godly decisions determine your life, so choose well! (end on "up" note)
